with extended island table top.

KITCHEN

GALLERY

WELCOME HOME

As one of the main gathering rooms in your house, we believe that a beautiful, quality kitchen is the best way to make you feel more at home. Our **kitchens** are designed to be used and are proven to be incredibly durable over time, no matter what your family dishes out. With **enviable designs**, you no longer have to choose between **beauty**, **function** and **durability**. Our **kitchens** are designed to give you more freedom. With storage choices flexible enough to meet your daily needs and infinitely customizable options, the **kitchen of your dreams** is within reach. Get inspired by browsing some of our **kitchen designs** or consult with one of our design experts to **craft a kitchen that is perfectly suited to you**.

CONTEMPORARY

DESIGN

paired with Aspen Oak HPL LK4573A slab wall cabinets.

CUTTING-EDGE CONTEMPORARY

Modern and minimalistic, our **contemporary designs** are the perfect blend of form and function highlighted by straight lines and smooth surfaces. **Cabinets** are often crafted from high gloss acrylics and textured wood mixtures to create a sleek, bold look. Whether you are looking for a full remodel or a simple update, **Zen Living** has the resources you need to completely customize your kitchen from the initial idea to the finished product. From **cabinets** and **handles** to **sinks** and **countertops**, your **ideal kitchen** is more attainable and more affordable than ever.

TRADITIONAL

DESIGN

Traditional style mitered door in Maple wipe stain Espresso ST-25238 with clear glass doors.

Traditional Design

CLASSIC COMFORT

Whether you are preparing food, gathering the family for dinner or entertaining guests, your **kitchen** is the hub of your home and should be functional, durable, and comfortable. If you love timeless design, look no further than our **traditional kitchens**.

Traditional kitchens bring elegance to your home. With an extensive selection of custom options available, you can create a kitchen that reflects your own personal style as well as one that will withstand the years to come.

Understated elegance

LASTING SOPHISTICATION

Characterized by decorative moldings, textures and wood grains, **traditional kitchen designs** are formal and elegant with an air of modest sophistication and class. More detail oriented and ornamental than their modern counterparts, these **kitchens** exude warmth and hospitality, making them the perfect spot for a friendly spot where family and friends can gather or unwind at the end of a busy day. The beauty of **traditional design** is that it encompasses a variety of styles making it easy to successfully mix and match finishes. Cabinets are often crafted from rich woods such as **maple, oak, walnut** and **cherry** to **create a timeless, classic look**.

Logel Homes, Auburn Rise development of 309 units over 5 buildings. Painted shaker Oxford white with feature LPL floating shelves and island.

Robson style cabinet in Maple OE Toffee ST-25612.

TRANSITIONAL

DESIGN

THE PERFECT MIX

The **kitchen** is the place to create memories that will last a lifetime. If it's your children's art museum, a place to cook for your family and friends or a place to nourish your mind, body and soul, it's the epicenter of your home. If you love the comfort of **traditional design** and the fresh look of **modern design**, a **transitional kitchen** is the **perfect mix for you**.

ELEGANT AND TIMELESS

Transitional style is the art of mixing. It retains the classic lines of traditional styles and marries them with lacquered finishes and lighter colours that are typically more modern in their appearance, resulting in a room that is equally masculine and feminine. In short, **transitional style** is an elegant and timeless design motif that combines new and old.

HPL Ghana Wenge LK064 slab doors and drawers with stacked cabinetry to the ceiling.

mudroom bench and coat storage unit.

Entry bench storage and uppers
featuring LPL MS517.

CLOSET

DESIGN

If you have ever found yourself searching endlessly through your closet to find that little black dress in time for date night, or have been frustrated tracking down your child's karate outfit in their pile of clothes, toys, and books, we have the solution for you. No matter how hard we try to keep our closets under control, it seems to have a way of becoming cluttered and disorganized.

We can help you maximize your closet space. If you have a large walk-in closet or a smaller space to organize, with our closet organizer ideas there is a storage solution for every space and budget. You can have a tidier, more manageable closet in no time.

- **Organize all of your accessories in your wardrobe with a lined drawer insert.**
- **Belt racks can be used to conveniently store belts or anything else you would like to hang.**
- **Drawer dividers are a simple addition to organize a drawer box. They are beautifully designed with matching materials.**
- **Organize your necklaces, earrings, accessories and small items in your wardrobe in a convenient drawer insert.**
- **Our shoe storage shelves can be fixed or adjustable and are set on the unit at an angle for easy access.**
- **Hampers are a great solution for tidying up laundry.**

Make your wardrobe a wonder with our great closet organizers and smart closet systems.

LPL413MM (woodgrain) and LPL104SH (white) wardrobe featuring closet rods, drawer boxes and pull-outs for all your storage needs.

CABINETRY

CABINET LINE

Frameless cabinets are built so that the cabinet door attaches directly to the side wall of the cabinet. This means that when the cabinet doors are closed, there is no reveal or surround around the door.

CABINET CONSTRUCTION

The Conformat and dowel system is specifically designed for cabinet joinery, **allowing for maximum durability and strength.**

A. 3/4" Hard Rock Maple Melamine.

B. Easy additional adjustment to drawer fronts and box matching edge tape.

C. Full height adjustable shelves.

D. 6-way adjustable full extension soft close hinges as standard.

E. Commercial grade adjustable legs.

F. Soft close undermount Slides as standard.

G. 3/4" solid back as standard.

H. Constructed with heavy duty Conformat Screws and Wooden dowels.

CABINET MATERIALS

Particleboard is an engineered product formed using waste wood products, such as sawdust, wood chips and sawmill shavings. The product is mixed with resin adhesives, formed into a sheet and heat pressed. The product is lightweight and relatively low cost.

MDF (Medium Density Fiberboard) is an engineered composite product made up of small wood fibers from soft and hardwood. These are mixed with resin adhesive and hot pressed to form a board.

MDF has a smooth finish with no wood grains making it easy to paint and cut. It is a stronger and more dense material than particle board.

Plywood is an engineered product made up of multiple sheets of veneer. The sheets are bonded and pressed together using adhesive to create one sheet. There are different grades and thickness of plywood dependent on the thickness and process used to compact during manufacturing. Plywood is a very sturdy material that is adaptable to different types of construction from flooring to cabinetry.

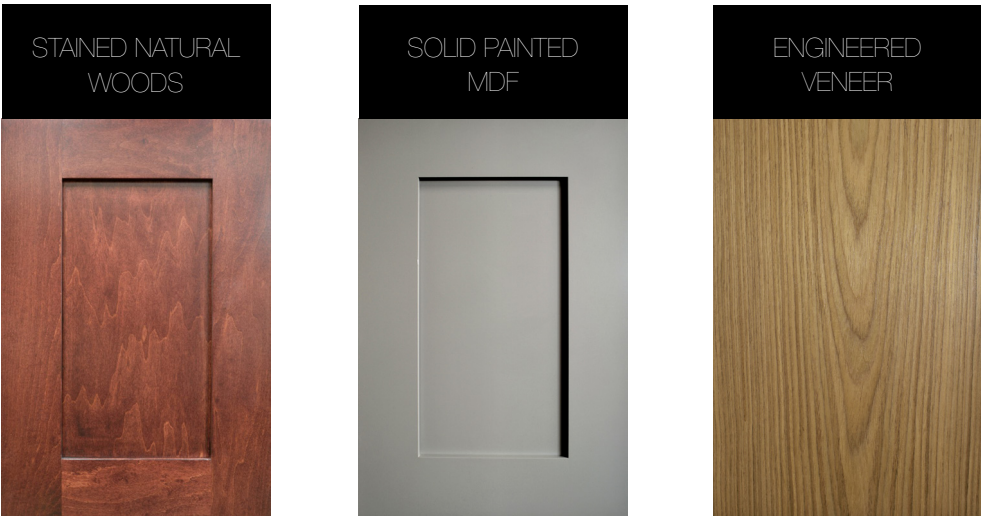

MATERIAL

COMPARISONS

Not sure where to start? Not to worry. To make sure you get the most out of your design, we have put together a **comprehensive comparison guide** to help you choose the perfect material to suit your every need.

veneers & solids

Natural woods provide a traditional look with intricate mouldings, wood grains and rich colours. We offer many different colours and patterns. Available in maple, oak, walnut, and cherry woods.

FINISHES & COLOURS

Since 2009, **Zen Living** has grown into Western Canada's largest kitchen cabinetry supplier. Being both the manufacturer and supplier means that we do not deal with any middleman markups and their associated markups. We pride ourselves on being able to provide our customers with beautiful high-end designs, in a wide selection of styles, at a competitive price. With *hundreds of colours, nine unique materials* and *numerous accessory options* to customize your space; we are sure you will find the look that fits your kitchen design and budget. Plus, soft close drawer systems and hinges are a **Zen Living** standard.

With over 50+ years of combined experience in cabinetry and design, our team at **Zen Living** has the skills and knowledge you need to turn your dreams into reality. Our facilities utilize the most up-to-date technology and machinery along with the finest quality craftsmanship.

Customer service is at our core and our design team will work with you to ensure your **Zen** experience is on budget, on time and hassle-free.

STAINED

Our stunning stained wood cabinets add warmth and texture to any space.

Because wood density can vary, stain may absorb in the cabinet slightly different than the samples shown here and in our showroom. There may be a minor colour variation from the examples below. When choosing a wood stained cabinet finish, our sales and design experts will help guide you through the process to ensure your satisfaction with the final result.

MOULDINGS

& ADORNMENTS

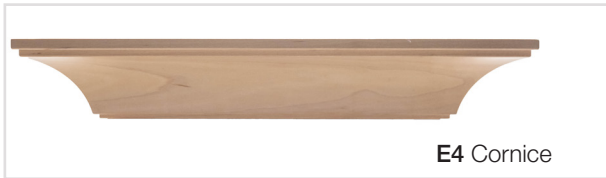

Often used to enhance your **kitchen** by filling void spaces with a **stylish trim**. It finishes the design beautifully and will add an increased level of elegance and style to the space.

CORNICE

Used to transition between the ceiling and upper cabinets. Can be used in conjunction with a riser.

E4 Cornice

E10 Cornice

E12 Cornice

E13 Cornice

VALANCE

Used to hide the underside of cabinets or to conceal lighting.

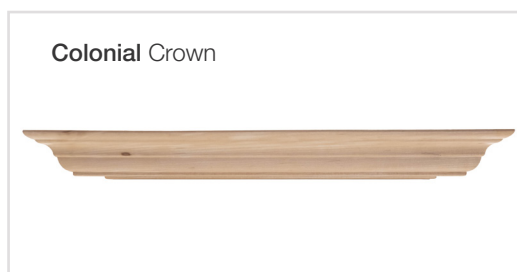

Light Valance

EXPERT TIP

Hidden valances: valances are hidden under longer cabinets to create a more seamless and clean look .

CROWN

Used on top of upper cabinets to help create a better visual appearance.

Colonial Crown

Shaker Crown

CORNERS & TRIM

Used to hide seam lines.

FURNITURE KICK

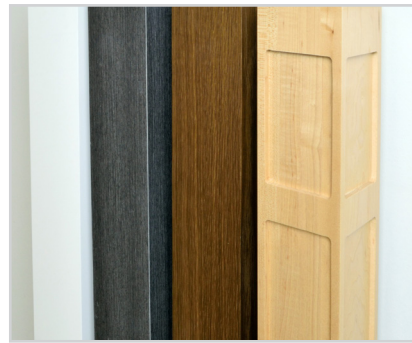

Used around the base cabinets to create a more bold appearance.

RISERS

Used to fill the empty space between the upper cabinets and ceiling. Risers are defined by straight lines to create a contemporary and clean look.

POSTS

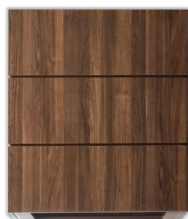

Available in a variety of styles. Posts not only provide structural support, but also add an element of design and style.

BARBRACKET

Typically used for island countertops when there is a 12 inch, or more, overhang.

RANGE HOOD COVER

A great way to cover or hide your range hood and to give your kitchen that finishing touch.

GLASS

Glass Doors are used by designers to **add light and colour** to kitchens. Used to **showcase vases, glassware** and other **collectibles** as **functional art**. A variety of styles and effects are available.

FRAME STYLES

Frames go hand in hand when selecting glass. You have a choice of **wood**, or **aluminum**. Aluminum frames come in either an **anodized** or **chrome finish**.

HINGES

& SLIDES

Your cabinet interiors include drawer slides and hinges. Choose from either of the following soft-close combinations **Standard** or **Blum**.

	STANDARD SOFT-CLOSE	BLUM SOFT-CLOSE
		
		
	Standard Hinge	Blum Hinge
	Standard Slide	Blum Slide
Drawer Load Capacity	35kg	35kg
Soft Close	✓	✓
Price	\$	\$\$

Rarely do we give a second thought to the way our **cabinets** and **drawers open and close**, that is, unless they squeak when they are in motion or don't glide on their tracks as easily as they should. The **drawers and hinges of your kitchen should function easily and quietly**. This is *easy to achieve* with our **high-quality drawer slides and hinges**.

SOFT-CLOSE DRAWER SLIDES have **high-quality dampers** to prevent the drawers from slamming when you close them. They are also outfitted with springs that help return the drawer gently to the cabinet. **Soft close drawer systems and hinges** are a **Zen Living standard**.

ACCESSORIES

KITCHEN

CORNER

Lazy Susan: Designed to utilize wasted space in a corner cabinet with rotating trays.

Floating Susan: Similar to a lazy susan without the central column to give greatest amount of storage space and with adjustable shelf heights.

Wari: Easily accessible, user-friendly movement. Upon opening, the front basket automatically swings out leaving free access to the back basket.

Twin: Optimal and functional unit designed to automatically pivot as the unit is pulled out.

FAQ

How long will my project take?

All projects vary in their timelines. When we go over the scope of your project, we will have a clear picture of how long the process will take to give you the results you are looking for. A few factors that may affect the project time include: Selecting what materials are needed for your project, confirming product delivery times, additions to the scope of the project, and obtaining permits, if required, for the renovation. In typical circumstances, after our first few meetings, our team will draft a project plan that will give you a close estimation on your project timeline.

How much will the project cost?

Renovation projects can vary widely in costs depending on the scope of the project and your project budget. As an example, if you are simply adding a wall to make an extra bedroom, this will be much more cost effective than adding a full bathroom to your main floor. Another element that may effect your project cost are the possibilities of any exterior construction that may involve structural changes. In this instance, an architect or engineer will be required for to ensure all elements of the project are completed within specific architectural guidelines, which will add some cost as well. Typically, kitchens, bathrooms, and ensuites tend to be the most expensive areas of a home to renovate. We will do our best to provide an accurate price estimate of your renovation once we are able to discuss all of the elements of your renovation project with you.

Will there be a mess during my project? Can I live in my house during the remodel?

Most renovation projects do require homeowners to adjust their living conditions and work around the renovation construction being done. For each of our projects, we ensure that homeowners are aware of every element in the planning and scheduling of work that needs to be done in order to make the renovation as painless as possible.

While the project is underway, our team of professional tradespeople are courteous, clean and take extreme care in every home renovation project. We take extra care with clean tarps in all project areas, we make sure to maintain clean workspaces and continually clean any high traffic areas so as not to be disruptive to the flow of your home and family.

Only in rare cases, depending on the area (or areas) being remodeled, it may not be possible to be in your home for a short period of time during the project.

Helpful things to consider before starting your project:

Open and honest communication with our team around your project budget is very important. Homeowners that are clear and upfront with the budget they are able to invest in their project are able to work with our team seamlessly from start to finish. It is important to us to be on the same page with all of our clients. We are working together with you to make your renovation dreams come true. We pride ourselves with open and honest communication around all costs and timelines so there are no surprises.

Here are a few costs to consider that people often miss as they are preparing their renovation project budget:

Product and service taxes, consulting fees, appliances, lighting fixtures, and new furniture.

"Zen is a very professional company that offers top quality material. Don't waste your money on the big box store products. These guys will build you a higher quality product at a very competitive price. Thanks Zen Living for a great experience!"

~Anthony

GLASS

GLASS BACKSPLASH

MODERN, CLEAN, FRESH

When you see our gorgeous glass backsplashes, you will wonder how your kitchen was ever completed without one. These stunning pieces of art serve the functional purpose of protecting your wall while adding elegance and sophistication to your space.

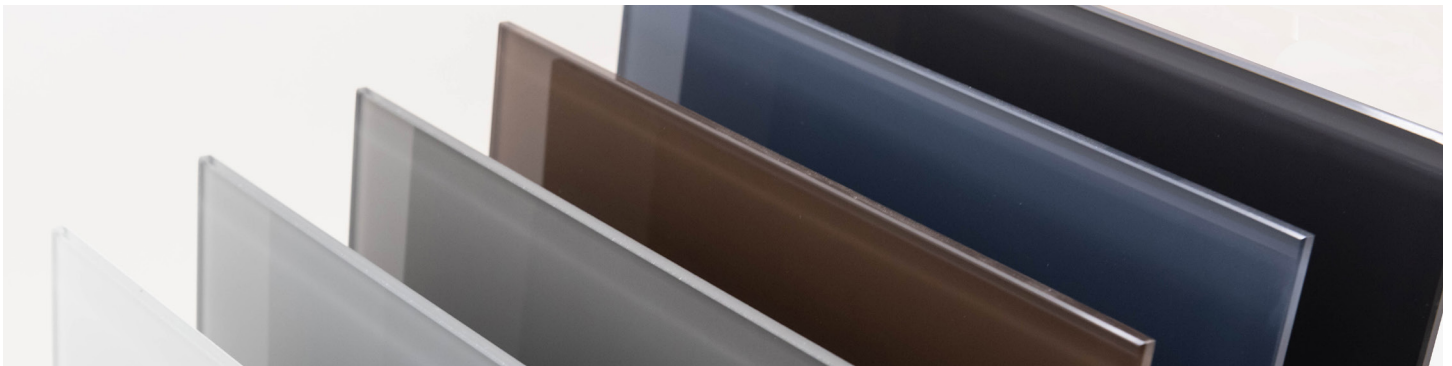

The glass sheet backsplash is a sheet of glass that can be painted in the colour of your choice and then installed on your wall. This approach offers a completely customizable look while being highly functional as it is easy to maintain and clean.

These stunning pieces of art serve the functional purpose of protecting your wall while adding elegance and sophistication to your space.

The contemporary kitchen is the design style for a glass sheet backsplash. Without grout joints, a sheet of glass is visually as clean as you can get.

Advantages:

- **Easily cleanable surface:** Glass is easy to wipe down making it a great option for the backsplash where food prep can easily splatter up on the backsplash while cooking.
- **No grout joints to seal:** With no grout the glass not only is easier to keep clean, but it does not require sealing of any kind.
- **Reflectiveness:** Light bounces off of glass, making it a great option for a kitchen with a lack of natural light.
- **Modern and clean:** A glass backsplash adds a level of elegance, uniqueness, and style to your kitchen.

RAILINGS

CLEAN, STYLISH, FUNCTIONAL

Our customized railings are designed to beautifully integrate with the style and ascetic of the rest of your home. Made with the highest quality products and finishes, our railings are not the focus of your home, but an absolute complement to every space.

Advantages:

- Easily cleaned without constant dusting and maintenance.
- Beautiful ascetic that flows easily with the design of your home.
- Our railings are incredibly durable. Our railings, although beautiful, are also there to keep you and your family safe. We take extra care to ensure the quality and safety of our railings exceeds the standard.

SHOWER GLASS

DURABLE, BEAUTIFUL, TIMELESS

Our enclosed glass showers are a subtle statement that will stand the test of time. High quality, completely customizable and incredibly functional, our glass showers open the space and provide an extra layer of style and class. They are easy to clean and maintain, and an excellent way to enhance the beauty and elegance of your bathroom.

Advantages:

- Easy to clean and maintain with appropriate products.
- Increased ascetic throughout the space.
- Quality and durability that will last a lifetime.

MIRRORS

TIMELESS, SIMPLE, ELEGANT

Make a statement in any room by adding a fully customized mirror in any shape or size to complement your space. You can have your mirror spread wall to wall or cut to any size that suits. Mirrors create the illusion of more light in any space. We also offer stunning framed mirrors that can perfectly match your cabinetry colour.

Advantages of framed:

- Ability to colour coordinate with your cabinetry selections
- Classy and sophisticated look
- Ability to create a statement piece

Advantages of frameless:

- Simple and clean look
- Ability to customize to any shape
- Larger reflective surface

MULTI FAMILY

DESIGN

Are you looking for cabinetry for a multi-unit project? **Zen living** has worked with many developers and builders across Canada and the US since 2009. We have cultivated an excellent reputation within the industry for providing full on-site presentation and immaculate service turnaround. Our builders have continued to supply us with ongoing projects.

We provide the highest quality materials at the best value for condos, infills and estate homes.

LEDCOR CONSTRUCTION

VERSUS - 10TH AVE, CALGARY

VERSUS features 444 residential suites across two towers (17 and 34 storeys in height).

HPL LK4478 slab doors with Marathon Grantchester Modern Hollow Pull for base cabinets and Crofton Modern pull for upper cabinets.

"We have had the sincere pleasure of working with **Zen Living Ltd** for the past 18 months on WAM Development Group's "**VERSUS**" helping us successfully build two towers comprised of **440 units** located in Calgary, Alberta.

Zen Living has proven to be a **detailed, process & service originated** company that allowed the project to meet our accelerated schedule. **Zen's Team provided clear, open communication.** Their performance throughout all construction stages was excellent demonstrating their commitment to professionalism and understanding of our Multifamily Cabinetry & Countertop requirement. **Zen Living has met or exceeded all of Ledcor's supply & installation expectations** with high-level quality. Ledcor Construction Limited would **highly recommend Zen Living Ltd.** as a Multifamily TradePartner/Supplier and looks forward to working with **Zen Living** in the future."

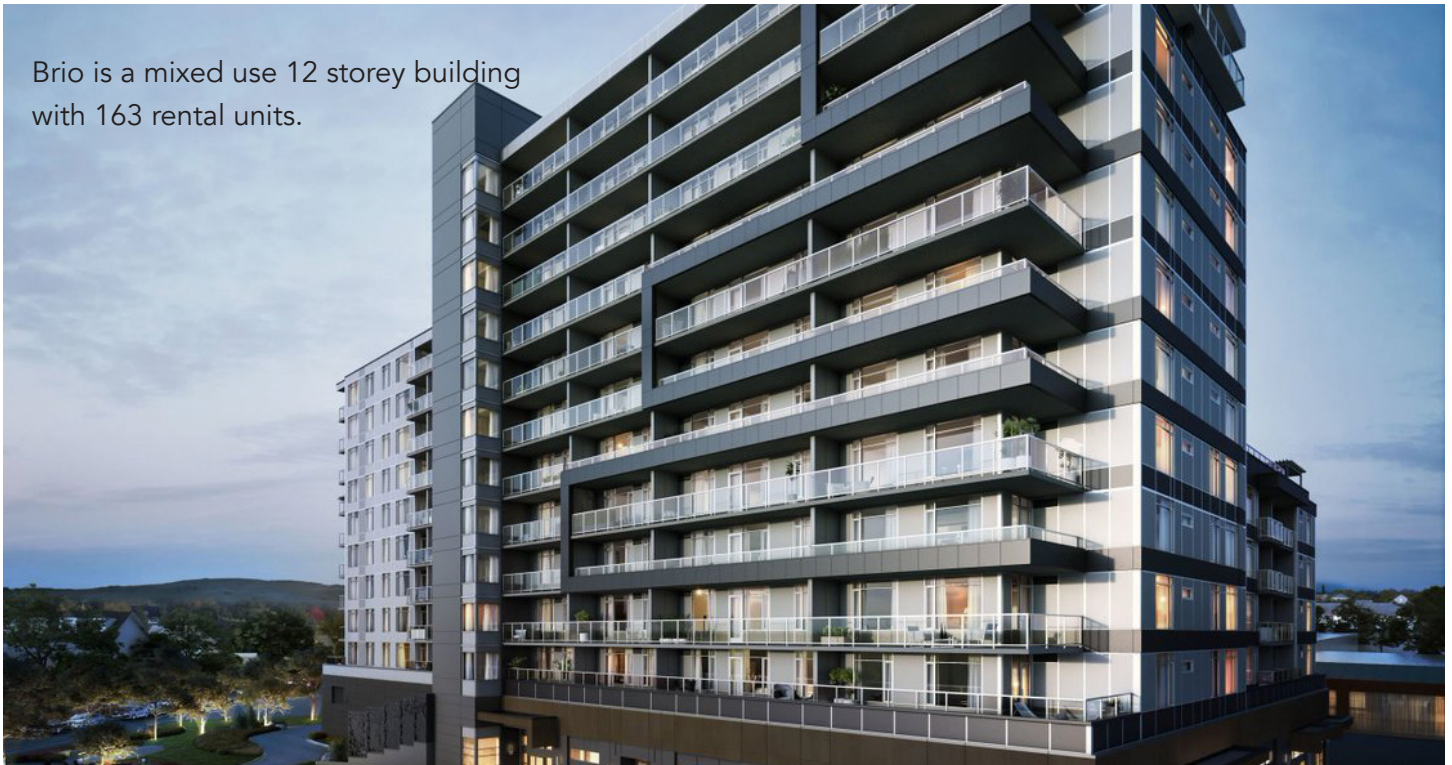

HPL LK998 slab doors featuring cooktop in island and base face frame cabinet for double wall oven.

CANA CONSTRUCTION

BRENTWOOD VILLAGE, BRIO, CALGARY

Brio is a mixed use 12 storey building with 163 rental units.

HPL Matte White FOR3200PL and Grey LK1173A with grey interiors and Hettich double wall drawer boxes. Richelieu Contemporary metal pull 107.

*"We had the pleasure of working with **Zen Living** for the in-suite cabinetry scope in the **BRIO multi-family residential tower**, a joint venture project between Boardwalk and RioCan. The project, which consisted of **162 residential units**, had an aggressive schedule and required a highly coordinated effort between all trades to meet timelines. **Zen Living** was able to provide the required resources and product to meet our schedule. **Zen Living** also provided value through suggesting alternate design solutions. When issues arose, they were proactive and responsive in resolving them. Both the office and on-site teams from **Zen Living** are professional and worked well in conjunction with other trades, providing a team-based approach that helped the project achieve its goals. We look forward to future opportunities to work with **Zen Living** again."*

LOGEL HOMES

AUBURN RISE, CALGARY

This project clients were given the choice of Shaker painted or stained and HPL. A mix of one and two bedroom units. 309 Units spread over 5 buildings.

*"After an extensive review in 2013, our company made the decision to move forward with **Zen Living** with an 80 unit multifamily condo building. Throughout the process **Zen** was pleasant to deal with; all of our required schedule deadlines were met throughout the construction of the building. Also, our construction staff was very happy with the responsiveness of **Zen** in dealing with any deficient products. As a result of **Zen's** performance and dedication, we decided to make **Zen** our preferred cabinetry installer. Currently, they are the only cabinetry company that we are working with."*

STEP BY STEP

GATHER IDEAS

In preparation for meeting with one of our design specialists, take some time to gather inspirational photos and browse the catalogue to gather ideas and inspiration.

MEASUREMENTS

Before you can determine the layout of your space, you will need to measure it. If you are uncomfortable measuring the space on your own, one of our design experts will be happy to come and do the measuring for you. Having rough dimensions and pictures for the initial consultation will be helpful in estimating and designing your project. Our design experts will always do a final measure to verify accuracy.

DESIGN

The look and feel of your kitchen is very important and we understand that you have a great vision for what you want your new kitchen to look like. Another factor that is very important in the planning stages is the functionality of your kitchen. Our design experts will give you advice to help optimize functionality and ensure the a layout you choose works for you and your family. The design stage is where you will choose materials, colours, accessories, etc.

MANUFACTURING

Your kitchen will go into production based on the timeline you have selected, 2-5 weeks or 10-12 weeks. In the meantime, all other trades can help you finish the rest of your renovation. You will get a notification when your kitchen is ready to be delivered or picked up.

INSTALLATION & SERVICE

Whether you are installing your cabinets or Zen Living is, good planning is essential to create a stress-free installation. If your cabinets are installed by Zen Living, our professional service team will inspect your cabinets to our high standards. They will replace anything damaged, touch up doors or adjust anything to perfect your kitchen, bath, closet, bar or mudroom.

"I am very pleased with the results of my kitchen renovation as done by ZEN LIVING. My kitchen went from being worn out and outdated to a spectacular new modern design featuring self closing drawers and cupboards doors in a Shaker style in Ultra White with fabulous quartz countertop. I went with higher cabinets with a crown moulding surround so that I wouldn't have an open space at the top which unfortunately just collects grease and dust. With any renovation there are challenges but Zen was there to assist and correct any issues in a timely fashion. Their install crew and follow-up inspection staff were very cordial and efficient in their roles. If you are in the market for a kitchen makeover contact Ly at ZEN LIVING"

~ Jim

LAYOUT &

MEASUREMENTS

MEASUREMENTS

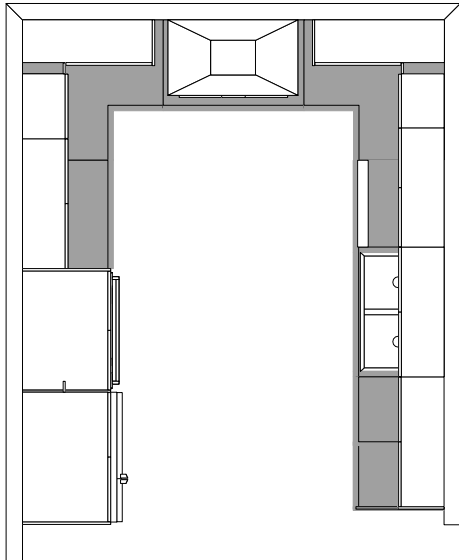

At **Zen Living**, we offer full service from beginning to end. Although having rough dimensions and pictures from your initial consultation will be helpful in estimating and designing your project, a **Zen Living** design expert will be happy to come and measure your space as we begin planning your renovation.

Here are the steps if you choose to measure your space out yourself.

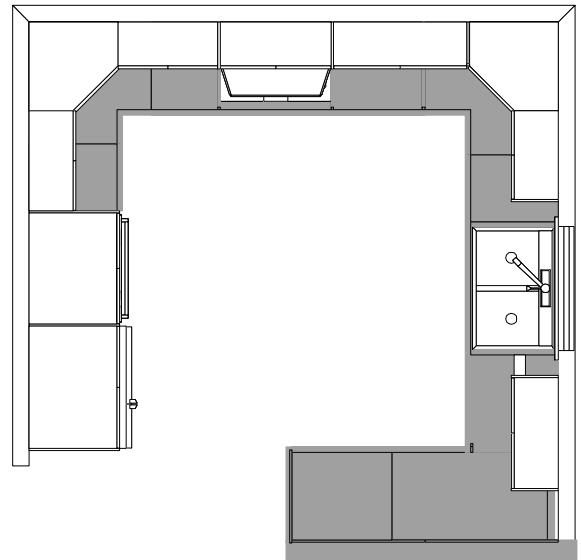

- 1) You can also download and print spec sheets & graph paper from <http://zen-living.ca/downloads.html>
- 2) Draw an outline of the room
- 3) Measure wall lengths
- 4) Measure ceiling heights
- 5) Measure and note the location of obstacles along each wall, recording their height, width, and depth from outside edge to outside edge. Include doors, windows, and vent pipes.
- 6) Identify and measure existing plumbing, appliance outlets - fridge & stove, lighting fixtures, hood range/HVAC vents, electrical outlets/switches on all walls.
- 7) Identify and measure any furniture or appliances that will be in the room.

LAYOUTS

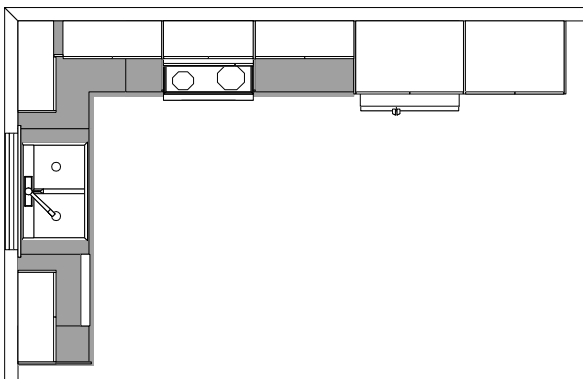

A properly laid out kitchen will determine how quick and efficient you are in the kitchen. The primary tasks in a kitchen take place between the refrigerator, stove, and sink. This creates the work triangle. We recommend the sum of all three sides of your work triangle not exceed 26 feet for maximum efficiency.

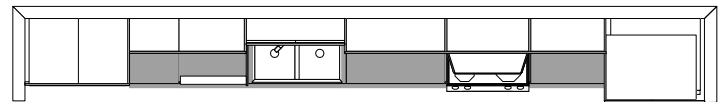

U Shaped - This layout creates a compact work triangle, plus plenty of counter space with appliances within close reach.

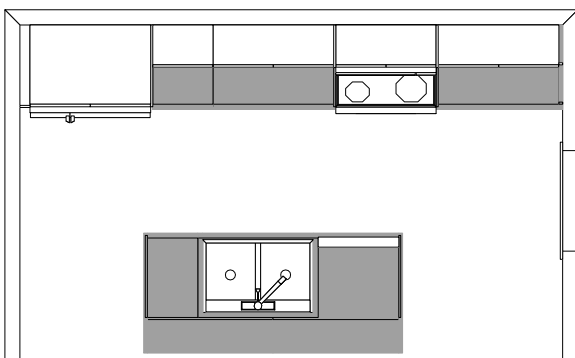

G Shaped - An U-shaped kitchen with an additional countertop area used for bar and dining.

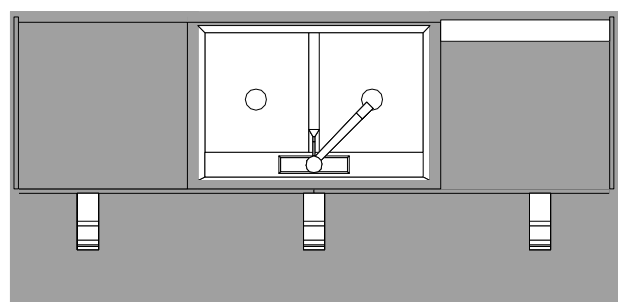

L-Shaped - Ideal for both small and medium homes and allows efficient use of corner space. Work zones in this layout work well with multiple people.

Single Wall - An open space concept that makes efficient use of a small kitchen space.

Gallery - A single wall kitchen with an additional island open on both ends.

Island - A popular addition to any layout, allowing placement of stoves, sinks, bar or dining area.

FREQUENTLY ASKED

QUESTIONS

WHAT PRODUCTS AND SERVICES DOES ZEN LIVING OFFER?

Zen Living specializes in cabinet manufacturing and countertop fabrication. We also offer: Glass backsplash, vinyl or engineered wood flooring, glass showers and glass railings. We offer design, delivery, and installation services for those products.

CAN I CUSTOMIZE MY CABINETRY?

Yes, **Zen Living** is a custom cabinet manufacturer, and we have the ability to produce cabinets to fit any specific size requirements and specifications.

HOW LONG DOES IT TAKE TO RECEIVE MY CABINETS AFTER ORDERING?

Our lead times vary between 2-5 weeks or 10-12 weeks depending on the options and features you choose. We also have division called **Zen Express**, with a *3-5 day delivery timeline and a full service option with a * two week timeline for complete cabinet installation timeline. See page for more information about this offering. * Some conditions may apply.

DO YOU MANUFACTURE YOUR OWN CABINETS?

Yes, **Zen Living** is one of the few Canadian manufacturers that produce their own cabinets. This enables flexibility in design and ensures the timely delivery and servicing of your cabinets.

WHAT KIND OF MATERIAL ARE YOUR CABINETS CONSTRUCTED OF?

Our interior cabinet material is 3/4" thick melamine furniture board which is thicker than the industry standard of 5/8". This material is a good balance of durability and cost. The melamine surface provides an interior that is bright and easy to clean.

CAN YOU HELP ME DESIGN MY KITCHEN?

Absolutely! You'll be working with one of our professional designers who will help you design your kitchen to be both functional and beautiful. They will guide you through the process of choosing the best cabinets and accessories while working within your budget. Our designers understand the dynamics of a beautiful and functional kitchen and will work with you to create the kitchen of your dreams.

WHY ARE YOUR PRICES LOWER THAN OTHER COMPETITORS?

We source the best materials from around the world. Our affordable prices are passed on to you because we manufacture our cabinets and countertops in-house, therefore cutting out middleman costs.

HOW LONG IS ZEN LIVING'S WARRANTY?

Zen Living guarantees our cabinets to be free of any defects in materials and workmanship for a period of two years from the date of purchase.

WHAT IS THE DIFFERENCE BETWEEN SUPPLY-ONLY AND FULL-SERVICE?

Our **Full-Service** offering includes our complete management of the project from start to finish as well as full design and installation services. With **Full-Service**, we manage everything involved in renovating the space: Our design professionals collaborate with clients on design ideas, then our project managers and installation experts coordinate and execute all aspects of the renovation so the process is headache-free for our clients!

Our **Supply-Only** division offers our products, fully assembled, direct to the customer without installation support. All Zen-Living products can be ordered through our Supply-Only division. We also offer an additional option through our ***Zen Express** line which supplies pre-sized cabinets, with 17 colours options at a lower price. Through both lines, cabinets are ordered and installed either by the homeowner themselves, our preferred contractors, or the homeowner's contractor of choice.

*Learn more about Zen Express on p171-174 or at ZenExpress.ca

CARE

& CLEANING

CABINETS

General day to day cleaning, you can help maintain the beauty of your cabinets by following these recommendations.

CLEANING GUIDELINES

A soft microfiber cloth dampened with warm water is usually sufficient to clean your cabinets. If a more thorough cleaning is required, you may use a fresh solution of dishwashing liquid mixed with warm water.

After cleaning with a damp cloth, dry immediately using another clean and dry micro fiber cloth.

SPLATTERS & SPILLS

Prolonged exposure to spills, such as food, water, oil or grease splatters and other liquids can cause permanent discolouration or damage to your cabinets. To ensure the prolonged durability of all our products, we recommend regular general cleaning.

REGULAR DUSTING

Use a clean, soft, lint-free microfiber cloth for regular dusting. Packaged dusting sheets are not required or recommended. Do not use pre-moistened dusting sheets or aerosol products made for dusting.

WAXING & POLISHING

Waxing is not required or recommended. Over time, waxing and polishing compounds may build up on the surface of your cabinets and cause a hazy, streaky or yellowed appearance which is very difficult to remove.

GLASS

Extra care is required when cleaning glass. Spray an ammonia-free glass cleaner on a clean, soft, lint-free micro fiber cloth or paper towel. Do not spray cleaner directly on the glass as the cleaner could seep behind the window dividers and cause damage.

PRODUCTS TO AVOID

Be sure to avoid the following cleaning products as they may cause damage to your cabinetry:

- Harsh detergents, strong soaps, abrasive cleaning products such as tub and sink cleansers, scouring powder/pads, steel wool or self polishing waxes.
- Sponges or dish cloths. They may contain food or oil residue, remnants of harsh cleaning solutions or particles that could scratch your cabinets.
- Solvent-based or petroleum-based products such as mineral spirits, nail polish removers or paint thinners.
- Ammonia or cleaning products that contain ammonia.
- Bleach or cleaning products that include bleach.
- Silicone based cleaning, wax or polish products.

HUMIDITY

Using a humidifier will prevent cupping and bowing in all materials. Wood expands as humidity increases and shrinks as humidity decreases. The optimal humidity level is 35% to 50%.

MOISTURE

Avoid draping damp clothes or dishtowels over the cabinets. Moisture can cause permanent damage to the finish like peeling and discolouration.

LIGHT

Exposure to direct sunlight tends to darken the colour of natural wood products and can fade painted wood surfaces and laminate surfaces. Consider draperies or blinds to shield your cabinets.

HEAT

Heat generated from self-cleaning oven features is much greater than what occurs during normal cooking. During this time, if heat escapes from the oven it can cause damage to your cabinets but you can minimize the risk by removing shelves and drawers nearest to the oven before using the self-cleaning feature.

EXPERT TIPS

- 1** Moisture is the worst enemy for all wood. Be sure to wipe away any excess moisture or liquid immediately.
- 2** Try to avoid direct sunlight as much as possible in order to avoid discolouration.
- 3** Countertops should be protected against heat as well as wet or coloured objects to avoid staining. Always protect the surface when using sharp tools.
- 4** Do not use generic glass cleaners like bleach, glass, acidic cleaners or degreasers on the countertop surface.

STONE COUNTERTOPS

On top of daily cleaning, simple, regular care and maintenance will help preserve the natural look and splendor of your countertops for years to come.

CLEANING

Clean the countertop with warm water and a few drops of dish washing detergent or antibacterial detergent using a soft cloth. Rinse the surface thoroughly with clean water and dry with a soft cloth.

HEAT / SPILLS

Use care and precaution when placing hot pots or pans and acidic base fluids on your granite countertop. Hot cooking pots will not damage the granite surface, however you should avoid leaving hot pots and pans sitting on the counter for long periods of time. Always use a trivet or mat under hot surface. Use drink coasters and wipe away any spills immediately to prevent stains on the stone.

ANNUAL MAINTENANCE

For granite countertops, annual re-sealing is a good idea, not all stone countertops require a seal but may benefit from a quality sealer product. Select a penetrating sealer for natural stone. Only use products specifically designed for natural stone, and ideally for granite specifically. Re-sealing every year will ensure that your stone countertops are well protected and will be more resistant. It is a must for marble, travertine and limestone.

LIMITED

LIFETIME WARRANTY

Thank you for choosing Zen Living as your supplier. Zen Living guarantees all products manufactured and sold by Zen Living to be free from any defects in materials and workmanship for a period of two (2) years.

In rare instances, Zen Living product is found to be defective, the defective part will be repaired free of charge, at the discretion of an authorized Zen Living representative. This warranty applies to the repairs and replacement and may not cover delivery cost or labour charges to remove or reinstall products or any related components.

This warranty is conditional on the original purchaser's proper maintenance, care and use of the product. Damage from normal wear and tear, misuse, abuse, negligence, improper storage, handling, cleaning, yellowing, fading, patina, staining, excessive heat, water penetration or force majeure, are the responsibility of the purchaser.

This warranty becomes null and void if Zen Living's products are altered in any way. Improper installation or alteration of supply only cabinets will not be covered by warranty. Our warranty does not cover service calls to adjust moving components such as doors and drawers of the cabinets. These adjustments are part of the typical home owner maintenance.

Colour changes in wood due to sunlight, household cleaners, smoke and other environmental conditions may be apparent over time, as these changes are customary for wood. These deviations are not eligible for warranty. Replacement or add on parts may not match the original cabinetry due to these changes, however over time should match more closely to the original cabinetry.

Wood will continue to expand and contract with seasonal changes therefore hairline cracks at door joints and movements of wood panels are characteristics of wood cabinetry and are not eligible for warranty. These will be most noticeable in our painted wood doors. There is no warranty coverage for warping, cracking or shrinking of doors resulting from inappropriate humidity levels (Relative Humidity of 35% -50% should be maintained throughout the year).

A tolerance of 3/16" in door warping (corner to corner) will be considered to be acceptable and will not be grounds for replacement.

Replacement parts are subject to availability, and therefore may differ somewhat from the original parts due to the passage of time, natural aging process, and evolution of products. This may include door styles, finishes and other parts or components integrally associated with products.

WARRANTY DOES NOT COME INTO EFFECT UNTIL ALL PRODUCTS AND SERVICES ARE PAID IN FULL.

CHARACTERISTICS OF WOODS & FINISHES

CABINETRY

- New homes generally have movement due to settling of the ground so adjustments to doors and drawers to cabinets may be required as your new home settles.
- A tolerance of 1/8"-3/8" space is acceptable between cabinet doors and drawers for allowance of expanding and shrinking from time to time.

Natural Woods / Veneers/ MDF

- Natural woods will commonly vary in colour and characteristics due to the density of natural solid woods and veneers which will prevent stain colour consistency.
- Five piece doors may expand and contract due to temperature and humidity, up to 0.5mm visible cracking around joint areas may be visible from time to time.

Textured HPL/MFC

- Textured Laminate is one of the most consistent and durable material in today's cabinetry market, in rare cases it may have a slight colour discoloration. ****Discoloration is not eligible for warranty.**

Acrylic

- Acrylic with its high gloss is one of the most effective ways to create elegance in today's cabinetry market.
 - Acrylic may have prevalent characteristics such as slight discolorations, blurs, slight waves, dimples and hair line scratches.
- **These are expected as they are inherent qualities in acrylic and will not be eligible for warranty.**

COUNTERTOPS

- New homes generally have movement due to the settling of the ground, which results in unlevelled cabinetry. As a result, shimming may be required as well. Due to cabinets shifting it may cause fracture cracks in the countertops.

Granite / Quartz

- Stone has natural characteristics which include, but not limited to natural colour variations, water lines or physical properties (fissures, surface pits, and blemishes) that are normal and natural for some stones.
- **These characteristics will not be eligible for warranty.**
- Due to the unique characteristics of stone, it is not possible to guarantee a match in the colour or veining when seaming two pieces together.
 - This warranty covers seam performance but not the appearance of the seam. Seam failure due to settling structural issues unrelated to the countertop installation is not covered.

Laminate Countertops

- Please be aware that plastic laminate products by nature are subject to minor surface imperfections and slight irregularities, and may contain some colour variations and/or small particles of foreign matter. Any imperfection that falls within the acceptable limits as established by the laminate manufacturer will not be considered defective.

Not eligible for warranty purposes:

- Cracks, chips, scratches and/or breakage not due to defects in material or workmanship.
- Moisture damage at or around cut outs, backsplash, field-joints or dishwasher.
- Exposure to excessive heat: This can cause laminate to separate from the substrate material to which it is bonded or melt the laminate itself.

SUPPLY ONLY CABINETS

All goods must be inspected upon receipt. Freight damage is the receiver's responsibility to notify a **Zen** representative on site prior to installation. A delivery waiver will need to be signed off on in the presence of the delivery driver to indicate your delivery has been received.

Zen Living will carry the risk of loss or damage of the product until you or your representative inspect, and sign for them upon receipt. Upon delivery the **Zen Living** representative will un-package your product on site. At this time, you or your representative will examine your order to ensure that there are no visible signs of damage, missing or incorrect pieces. Indicate any problem on the Delivery Wavier. In the event that there is missing, damage or incorrect pieces upon delivery, a service part will be sent back out to you. A signed delivery wavier, without notations of missing, damaged or incorrect item(s) represents your acceptance of the complete order.

Either you or your representative, that is someone 18 years of age or older, must be present to receive the merchandise at the agreed upon day and time window. If no one is available to receive the delivery, a re-delivery time and date will be arranged. This agreement is with you and **Zen Living**. **Zen Living** will not be held responsible if you decide to have a 3rd party accept, receive and sign at the handover of items without the notations of visible defects of packaging, damaged item(s), or missing merchandise.

If we are unable to gain access to the agreed delivery address, we will return the goods to our warehouse and make contact with you to re-arrange delivery.

Please make sure there is adequate access and space to complete the delivery, prior to delivery ensure that there is adequate room to make the delivery considering hallways, staircases and elevators. Ensure there is a clear pathway from the entry into the drop off area for the cabinets. Ensure all appliances are moved out safely out of the way to prevent any damages. Ensure to protect your flooring to prevent any damages during the delivery. (**Zen Living** recommends using Rhino board which can be purchased at your local hardware store).

(Service calls for these purposes are not covered under this warranty)

EXPRESS

Zen Express is a division of **Zen Living** that provides you with the same superior quality and workmanship you have come to expect from us at a fraction of the cost.

We are proud to deliver two convenient offerings with the **Zen Express** line:
Supply-Only and **Full-Service**.

ZEN EXPRESS SUPPLY ONLY

Our Supply-Only division provides our product directly to you, the homeowner, to install yourself, or using a general contractor of your choice. Our product is **box delivered** right to your door for free within ***3-5 days**. We also have a list of preferred professional installers for you to choose from if you would like!

*for delivery, some conditions may apply.

ZEN EXPRESS FULL SERVICE

Our Full-Service option utilizes our skilled and experienced in-house installers to complete your project without any added coordination for you. With this option, your kitchen will arrive and be fully installed within ***two weeks** of ordering.

*some conditions may apply.

HOW ZEN EXPRESS WORKS

SEAMLESS ORDERING

You can choose from 16 stunning finishes and a wide variety of popular custom cabinet options and hardware.

PROFESSIONAL DESIGN

Whether you are installing the cabinets on your own, using a contractor, or one of our Full-Service expert installers, you do not have to do all of the planning on your own! You can perfect your design with one of our Zen Express Design Specialists.

Working with our design team, you will be able to create customized drawings for your space so you can see your vision come to life before placing your order. Imagine, your design done your way with the help and guidance of a professional designer without any extra cost!

TWO-YEAR WARRANTY

We provide a two-year warranty on all materials & workmanship. All of our Marathon hinges & hardware are guaranteed with a 25-year warranty. For more details on warranty please visit zenexpress.ca/warranty.

HIGH GRADE TIMBER

Our timber is sourced through FSC Standard supply chains. We use the highest level of European manufacturing techniques & standards and utilize vertical integration within of our manufacturing facilities.

FACTORY DIRECT

We offer superior products at competitive pricing. We pride ourselves in our ability to remain competitive without compromising quality and workmanship because we are both the supplier and manufacturer of our products.

BOX CONSTRUCTION

Most big box cabinet systems rely on a back rail and slim backs to hang their cabinets. Our cabinets have a 3/4" back providing a solid drilling surface throughout while also adding increased structural integrity. This also provides better opportunity to make any necessary adjustments when walls are not straight or level. A certain advantage to installing our cabinets over our competitors.

APPROVED INSTALLER LIST (SUPPLY-ONLY)

You can install our cabinets yourself or use your own contractor to install your cabinets. We offer the option to choose from a Zen Express approved list of professional, experienced, and certified contractors.

*FREE DELIVERY

We will deliver direct to your jobsite. You can book your delivery time with our convenient Express booking app.

*Some conditions may apply, please consult with a Zen Express representative to schedule your delivery.

NO ASSEMBLY REQUIRED

Our cabinets will arrive to your job site completely assembled and ready to install. This will save you countless hours on your project.

CABINET CONSTRUCTION

¾" hard rock maple melamine interior with ¾" solid back. Constructed with commercial grade Conformat screws and wooden dowels.

CABINET COLOUR

At Zen Express, we have something for everyone. Whether you are creating a space to relax in rustic charm, find peace in a clean modern space, or up the tempo with sleek contemporary style, **Zen Express** gives you sixteen in-stock finishes that will work with every style in any space.
